

Paestum project

The first non-EU refugee inserted in the
structure: Jack Sadick

Jack Sadick's profile

- Jack is a young man from Ghana
- It arrived on the Italian coasts with the «barges of the sea»
- Has refugee status
- He is 34 years old and is in fairly good physical condition even though some metabolic dysfunctions cause tachycardias
- Since his arrival he has been a guest at the La Rada Consortium where he learned a little Italian
- His residence permit would expire on December 31st but with the internship activated at the Maggiolina on December 20th the permit was renewed

The experience gained in these first six months

Here is what Alberto Russo reports, agronomist of the OP La Maggiolina of the Paestum headquarters who has been appointed Jack's tutor:

- Jack knew immediately how to fit into the new working environment
- He has socialized well with all his work colleagues both with the Italians and with the workers of the Indi community, historically very strong and well rooted in the territory of Paestum and in force at the salad companies.
- His incredible good humor and his infinite gratitude for the possibility given to him of insertion make him a positive example for all his colleagues
- Do not miss an opportunity for a gesture of kindness with work colleagues or to give a flower to colleagues
- He is very respectful of the hierarchy and of the company organization and is working to perform the task entrusted in the best possible way

The task entrusted to Jack

- Because of the metabolic dysfunctions and tachycardias, it was decided to assign Jack a function within the product processing warehouse to avoid too costly work from a physical point of view and to avoid the thermal stress of working in the field under greenhouse
- Its role is to manage the circuit of collapsible side boxes (cpr, Ifko, Europool) used in the processing line, ensuring that the line is continuously powered by opening all the boxes that arrive at the warehouse
- This work is done by Jack with great precision and remarkable speed

Jack's future prospects

- The commitment shown in recent months and the excellent results obtained, make Jack an absolutely efficient and effective worker and have led the Maggiolina Manger to decide for his confirmation in the company
- The internship expired on June 19 was commuted from June 20 in a fixed-term contract
- This will guarantee him the possibility of a well-deserved integration into the territory of Paestum

Thanks for the attention
